Rules for integrands of the form  $(c + dx)^m (a + b Sinh[e + fx])^n$ 

N: 
$$\left[u^{m}\left(a+b\,\text{Sinh}\left[v\right]\right)^{n}\,\mathrm{d}x\right]$$
 when  $u=c+d\,x\,\wedge\,v=e+f\,x$ 

Derivation: Algebraic normalization

## Program code:

```
Int[u_^m_.*(a_.+b_.*Sinh[v_])^n_.,x_Symbol] :=
    Int[ExpandToSum[u,x]^m*(a+b*Sinh[ExpandToSum[v,x]])^n,x] /;
FreeQ[{a,b,m,n},x] && LinearQ[{u,v},x] && Not[LinearMatchQ[{u,v},x]]

Int[u_^m_.*(a_.+b_.*Cosh[v_])^n_.,x_Symbol] :=
    Int[ExpandToSum[u,x]^m*(a+b*Cosh[ExpandToSum[v,x]])^n,x] /;
FreeQ[{a,b,m,n},x] && LinearQ[{u,v},x] && Not[LinearMatchQ[{u,v},x]]
```
